DETAILED ACTION

Specification

1. The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Drawings

2. At least figures 17-19 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.121(d)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the

Art Unit: 2838

applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-9 and 11-20 are rejected under 35 U.S.C. 102(e) as being anticipated by KOKAI (JP – 11-45125: supplied by applicant).

Kokai discloses claims 1-9 and 11-20 as claimed; including the PN junctions (D1, D2); current sources (P1-P3), resistors (R1-R3), differential amp (DA1), bias circuit (figure 12) supply voltages (VDD, VSS), current mirror (N20, N21: figure 20).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over KOKAI (JP – 11-45125) in view of Maulik (US 6,133,719).

Kokai discloses the claimed subject matter in regards to claim 9 except for the differential amp having nine transistors connected as claimed.

Maulik teaches of a differential amp having 5th through 12th transistors (16, -19, 24, 32, 13, 49, 31, 41) for operating the differential amplifier.

Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to have a differential amp having 5th through 12th transistors connected amongst themselves as claimed in order to operate the differential amplifier.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US 6,683,445 Park discloses an internal power voltage generator; US 6,052,020 Dole discloses a low supply voltage sub bandgap reference.
